Introduction

Congratulations on your purchase of a ZoomText Large-Print Keyboard, with easy typing and quick access to ZoomText (version 9.03 and later).

Your new ZoomText keyboard features large-print keycaps that are easy to see, even in low light – allowing for fast, accurate typing and reduced eyestrain.

The ZoomText keyboard also includes twelve feature keys that provide fast access to essential ZoomText commands, Windows commands and opening a program, webpage or document.

With the ZoomText feature keys you can...

- Start ZoomText
- Zoom in and out to any magnification level
- Activate colour, pointer and cursor enhancements
- Launch ZoomText's Web Finder
- Toggle speech on and off
- Activate typing echo
- Launch ZoomText's AppReader, DocReader and SpeakIt tools

The Perfect Companion

The ZoomText Large-Print Keyboard is the perfect companion to ZoomText Magnifier and ZoomText Magnifier/Reader (version 9.03 and later). When used together, your low-vision workstation is complete.

System Requirements

The following hardware and software is required to use the ZoomText keyboard:

- USB keyboard connection
- Windows 8, Windows 7, Vista, or XP
- ZoomText 9.03 or later (to use the ZoomText feature buttons)

Installing the Keyboard Software

Before you connect the ZoomText keyboard to your system, ZoomText Magnifier or Magnifier/Reader (version 9.03 and or later), and the ZoomText keyboard software should be installed on your system. These installations are required in order to use the ZoomText feature keys.

To install ZoomText Magnifier or Magnifier/Reader, refer to your ZoomText User's Guide or Quick Reference Guide. To install the ZoomText keyboard software, follow the instructions provided below.

► To install the keyboard software

1. Insert the ZoomText keyboard software CD into the CD drive.

The Setup program will start automatically.

2. Follow the on-screen instructions to complete the installation.

► If Setup does not start automatically

1. In the Windows **Start** menu, select **Run...**
2. Browse to your CD-ROM drive.
3. Select the Setup program and click **Open**.
4. Click **OK** in the Run dialog box.

Updating the Keyboard Software

To keep your ZoomText keyboard software up-to-date with the latest fixes and enhancements, you should periodically run the Check for Updates command, located in the ZoomText Keyboard program folder. The Check for Updates command launches your web browser to the online keyboard update service, which checks to see if you are running the latest version of the ZoomText Keyboard software. If an update is available, instructions appear for downloading and installing the update.

- ▶ To check for ZoomText keyboard updates
 - In the Windows **Start** menu, choose **Programs ▶ ZoomText Keyboard ▶ Other ▶ Check for Updates**.

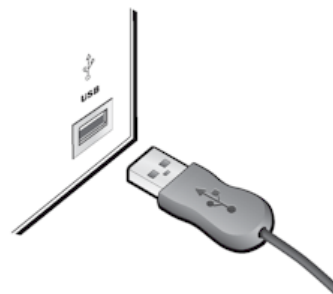

Your web browser will open to the ZoomText Keyboard updates web page. The web page will indicate whether or not an update is available. If an update is available, follow the instructions for downloading and installing the update.

Note: An Internet connection is required to use this feature.

Connecting the Keyboard

The ZoomText keyboard can be connected to your computer through a USB port.

- ▶ To connect to a USB Port
 1. Plug the rectangular USB connector located at the end of the keyboard cable into your computer's rectangular USB port.

Using the ZoomText Keyboard

The ZoomText keyboard is a standard size keys and a standard layout, so adjusting to any differences between your old keyboard and the ZoomText keyboard should be quick and easy. The low-profile design makes typing fast and comfortable. The feature keys are also quick and easy to use, thanks to their simple tactile layout and familiar labels.

ZoomText Large-Print Keyboard

Using the Feature Keys

The twelve feature keys (located across the top of the keyboard) have three command layers that give you quick access to the essential ZoomText commands (layer 1), Windows commands (layer 2) and your own user-defined commands (layer 3).

- The **ZoomText Commands** layer provides one-touch access to the most commonly used features in ZoomText Magnifier and ZoomText Magnifier/Reader. These commands are instantly accessed by pressing the desired feature key. The icons printed above the feature keys represent the ZoomText commands that are associated with each feature key. These commands are described in the “ZoomText Commands” tables on page 12. For complete information on the ZoomText features associated with these commands, refer to the ZoomText User’s Guide or the ZoomText Help system.

- The **Windows commands** layer provides fast access to a variety of Windows commands, including multimedia, Internet, email and more. These commands are accessed by holding the down the **Shift** key and pressing the desired feature key. The icons printed below the feature keys represent the Windows commands that are associated with each feature key. These commands are described in the “Windows Commands” tables on page 14.
- The **User-defined Commands** layer provide fast access to your choice of ZoomText commands, Windows commands, or program commands to open a program, webpage or document. These commands are accessed by holding the down the **Ctrl** key and pressing the desired feature key. For information on assigning user-defined commands, see “ZoomText Keyboard Settings” on page 16.

Using the Feature Keys with ZoomText Magnifier

In the ZoomText commands layer, five of the feature keys are assigned to speech and reading commands that are not available in ZoomText Magnifier.

Therefore, when using the ZoomText keyboard with ZoomText Magnifier, pressing these five keys in the ZoomText commands layer will have no action.

ZoomText Commands

These ZoomText commands are accessed by pressing the desired feature key.

Key	Description
	Starts ZoomText. Also enables and disabled ZoomText when ZoomText is running.
—	Increases ZoomText's magnification level (one level at a time).
+	Decreases ZoomText's magnification level (one level at a time).
	Toggles ZoomText's colour enhancements on and off.
	Toggles ZoomText's mouse pointer enhancements on and off.
	Toggles ZoomText's text cursor enhancements on and off.
	Opens the Web Finder.

The following feature keys are assigned to speech and reading features that are only available in ZoomText Magnifier/Reader.

Key	Description
	Launches AppReader to read text within the last active application.
	Launches DocReader to read text from the last active application.
	Launches the SpeakIt tool allowing you to read selected areas of the screen.
	Toggles ZoomText's typing echo on and off.
	Turns speech output on and off.

Windows Commands

The Windows commands are accessed by holding down the **Shift** key and pressing the desired feature key.

Key	Description
	Launches the default media player.
	Toggles play and pause in the default media player.
	Moves to the previous track in the default media player.
	Moves to the next track in the default media player.
	Increases the volume.
	Decreases the volume.
	Mutes the volume.
	Opens the My Computer applet.
	Activates the default web browser's search tool.
	Opens the default browser to the assigned home page.

(Continued)

Launches the default email program.

Refreshes the current web page in the default browser.

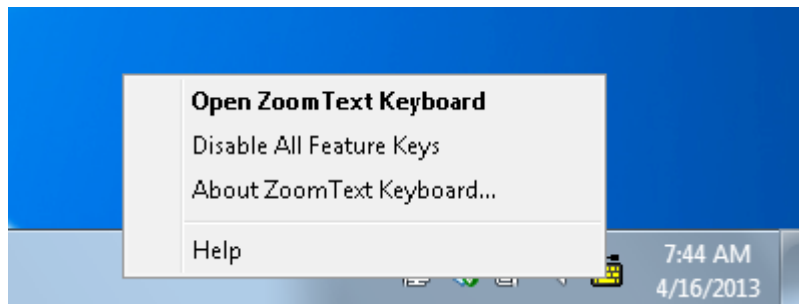

ZoomText Keyboard Settings

The ZoomText Keyboard Settings allow you to assign commands for each feature key in the user-defined command layer. The keyboard settings also allow you to configure how the keyboard software starts and appears on your system.

The ZoomText Keyboard Tray Icon

When the ZoomText keyboard software is running, its program icon appears in the system tray (next to the clock). Clicking on the tray icon will pop up a menu that allows you to...

- Open the ZoomText Keyboard Settings dialog.
- Disable the ZoomText feature keys.
- View program version information.
- Open the ZoomText Keyboard Help system.

ZoomText Keyboard tray menu

The ZoomText Keyboard Settings Dialog

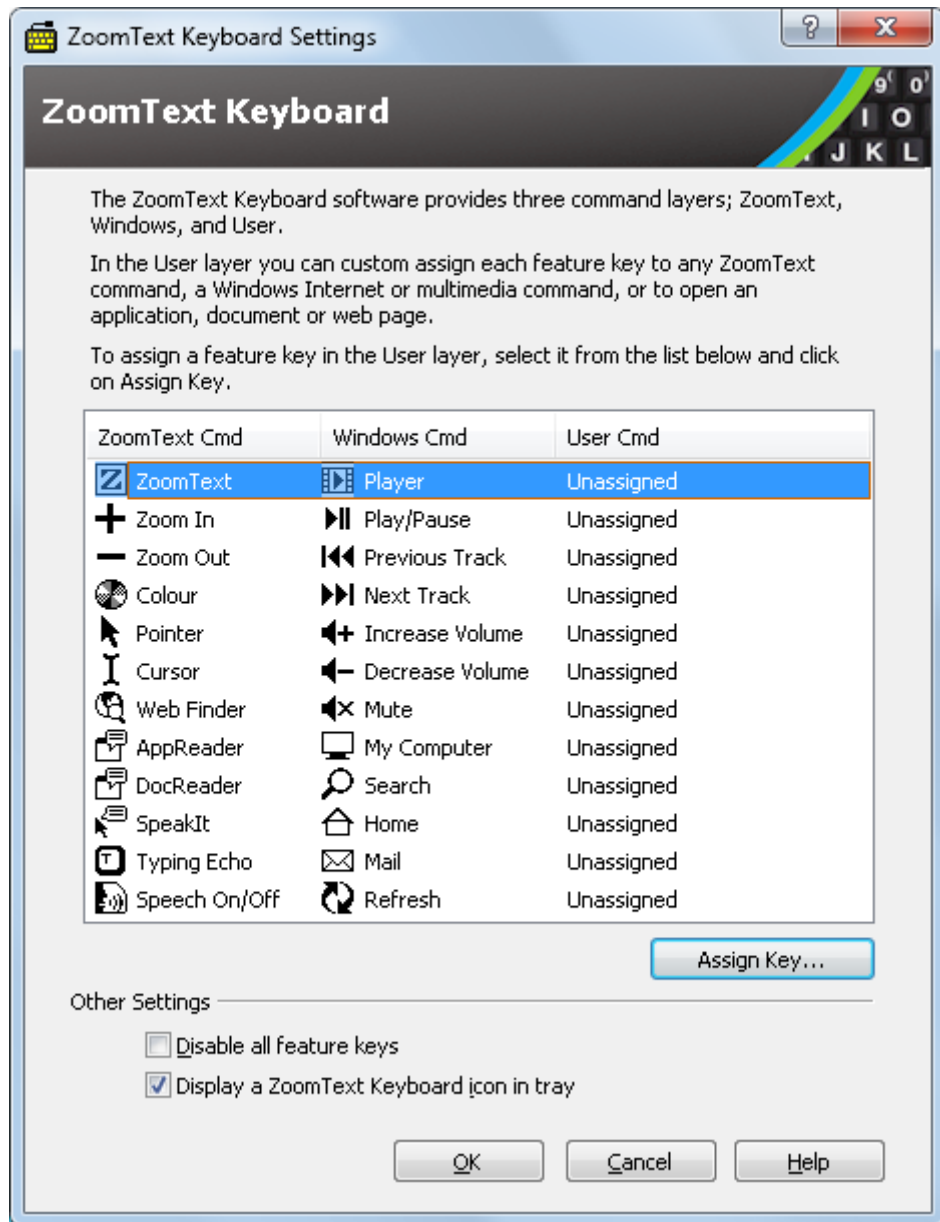

The ZoomText Keyboard Settings dialog allows you to examine the current feature key command assignments and assign commands for each feature key in the user-defined command layer—using the Assign Key wizard. The Keyboard Settings dialog also allows you to disable all of the feature keys and hide the ZoomText keyboard tray icon.

- To open the keyboard settings dialog

Do one of the following:

- Click on the ZoomText keyboard icon in the system tray and then select **Open ZoomText Keyboard** from the tray menu.
- In the Windows **Start** menu, choose **Programs ► ZoomText Keyboard ► ZoomText Keyboard**.

The ZoomText Keyboard Settings dialog appears.

ZoomText Keyboard Settings dialog

The following table describes the ZoomText keyboard settings.

Setting	Description
Key Label	Displays a list of ZoomText feature keys.
Assigned Command	Displays a description of the command that's currently assigned to the associated feature key.
Assign <u>K</u> ey	Opens the Assign Key wizard for the highlighted item in the Key Label list.
<u>D</u> isable all feature keys	Disables all of the ZoomText feature keys. This option is provided to circumvent conflicts with built-in multimedia keys on laptop systems, such as volume up, down and mute controls.
Display a ZoomText Keyboard <u>i</u> con in tray	When the ZoomText keyboard software is running, its system tray icon is displayed.

The Assign Key Wizard

When selecting the **Assign Key** button in the ZoomText Keyboard Settings dialog, the Assign Key wizard appears. The Assign Key wizard allows you to assign commands in the user-defined command layer to your choice of ZoomText commands, Windows commands, or to open an application, web page, or document.

- To reassign ZoomText feature keys
 1. Open the **ZoomText Keyboard Settings** dialog and select the key that you want to reassign.
 2. Click on the **Assign Key** button.

The Assign Key wizard opens.

3. Choose the desired assignment type and then click the **Next** button.

The wizard will present a list of command options for the selected assignment type.

For information on command options, see...

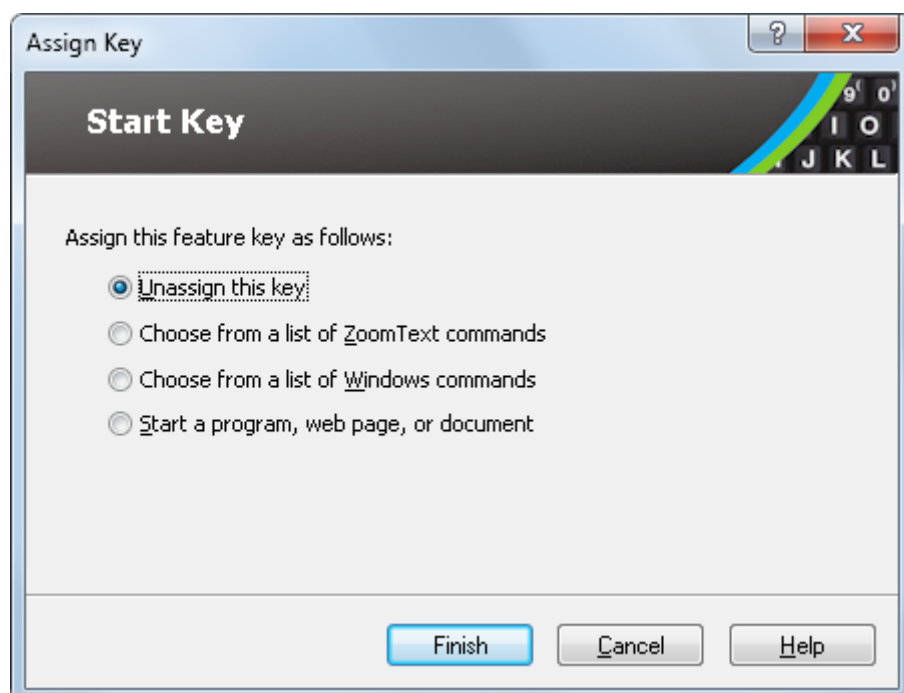

“Assigning ZoomText Commands” on page 23.

“Assigning Windows Commands” on page 32.

“Assigning Program Commands” on page 35.

Quick Tip

*You can also hold down the **Alt** key while pressing a feature key to open the Assign Key wizard for that particular key.*

Assign Key wizard – main dialog

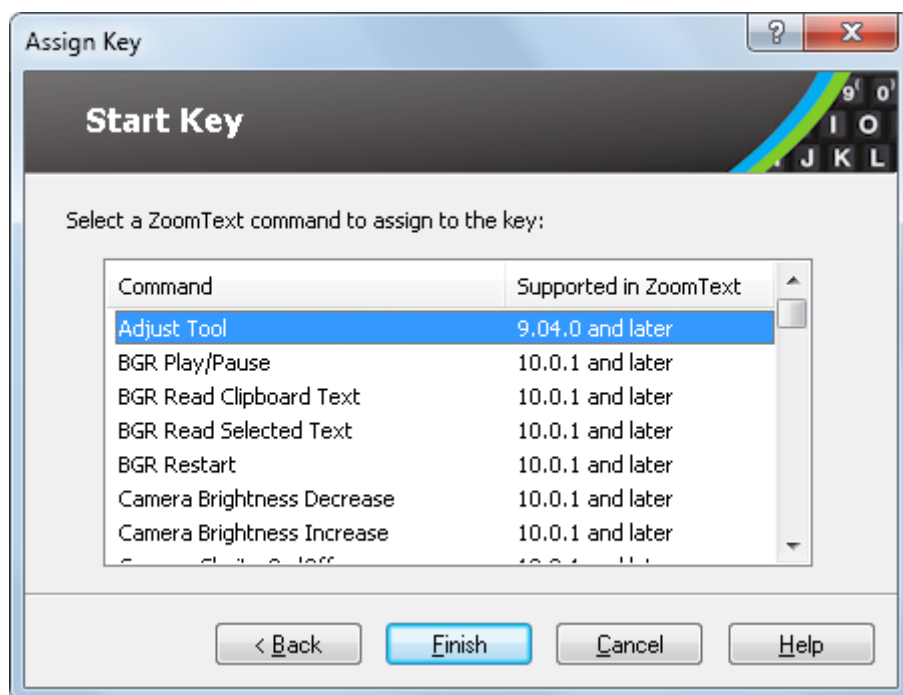

The following table describes the settings in the Assign Key wizard's main dialog box.

Setting	Description
<u>U</u> nassign this key	Disables the selected feature key.
Choose from a list of <u>Z</u> oomText commands	Allows you to assign a ZoomText command to the selected feature key.
Choose from a list of <u>W</u> indows commands	Allows you to assign a Windows command (Internet or multi-media) to the selected feature key.
<u>S</u> tart a program, web page, or document	Allows you to specify a program, web page or document to open when pressing the selected feature key.

Assigning ZoomText Commands

When selecting the **Choose from a list of ZoomText commands** option in the Assign Key wizard, the dialog shown below will appear. This dialog allows you to choose a ZoomText command to assign to the feature key that you've chosen in the ZoomText Keyboard Settings dialog.

- ▶ To assign a ZoomText command to a ZoomText feature key
 - Choose the desired ZoomText command and then click the **Finish** button.

Assign Key wizard – ZoomText command options

The following tables describe the ZoomText commands that can be assigned to ZoomText feature keys. For complete information on the ZoomText commands, refer to your ZoomText User's Guide or the ZoomText Help system.

Configuration Commands	
Load Configuration 1 ... 10	Loads the ZoomText configuration (if assigned) corresponding to the selected number – 1 through 10.
Magnification Commands	
Increase Power	Increases ZoomText's magnification level (one level at a time).
Decrease Power	Decreases ZoomText's magnification level (one level at a time).
Zoom Window Full	Sets the zoom window type to Full.
Zoom Window Lens	Sets the zoom window type to Lens.
Zoom Window Line	Sets the zoom window type to Line.
Zoom Window Overlay	Sets the zoom window type to Overlay.

(Continued)

Zoom Window Docked Top	Sets the zoom window type to Docked Top.
Zoom Window Docked Bottom	Sets the zoom window type to Docked Bottom.
Zoom Window Docked Left	Sets the zoom window type to Docked Left.
Zoom Window Docked Right	Sets the zoom window type to Docked Right.
Cycle Through Zoom Window Types	Cycles through the zoom window types in order.
Cycle Through Docked Window Types	Cycles through the docked zoom window types in order.
Adjust Tool	Activates the zoom window Adjust tool, used for sizing and moving a zoom window.
Freeze Window Tool	Activates the Freeze tool, used for creating and adjusting the Freeze window.
Enable/Disable Freeze window	Enables and disables the Freeze window.
Enable/Disable Colour Enhancements	Enables and disables the selected colour enhancements.

(Continued)

Enable/Disable Pointer Enhancements	Enables and disables the selected pointer enhancements.
Enable/Disable Cursor Enhancements	Enables and disables the selected cursor enhancements.
Open Desktop Finder	Opens the Desktop Finder.
Open Web Finder	Opens the Web Finder.
Open Text Finder	Opens the Text Finder.
Miscellaneous Commands	
Locator On/Off	Enables and disables the view locator (when using the Overlay or Docked zoom windows).
View Mode	Activates View mode.
Move Mouse To View	Moves the mouse pointer into the magnified view.
Move View To Mouse	Moves the magnified view to the location of the mouse pointer.
Pass Thru	Forces ZoomText to pass the next hotkey combination to the current application.

Reader Commands	
Enable/Disable Speech	Turns speech output on and off.
Increase Speech Rate	Increases ZoomText's speech rate (one level at a time).
Decrease Speech Rate	Decreases ZoomText's speech rate (one level at a time).
Typing Echo Mode	Cycles through the typing echo modes.
Mouse Echo Mode	Cycles through the mouse echo modes.
Start AppReader	Launches AppReader in the current application.
Start DocReader	Launches DocReader in the current application.
Speak-It Tool	Activates the SpeakIt tool.
Reading Zones Commands	
Trigger Reading Zones 1 ... 10	Triggers the selected reading zone (if exists) – 1 through 10.
Next Reading Zone	Triggers the next reading zone for the current application.
Previous Reading Zone	Triggers the previous reading zone for the current application.

Screen Reading Commands	
Say Window Title	Speaks the title of the active window.
Say Focus	Speaks the item with focus.
Say Status Bar	Speaks the status bar information.
Say Time	Speaks the current time of day.
Say Date	Speaks the current day.
Say Clipboard	Speaks the contents of the Windows clipboard.
Cycle Through Speech Engines	Cycles through the available speech synthesizers on the system.
Cycle Through Verbosity Levels	Cycles through the verbosity levels.

Tools Commands (ZoomText 10 only)	
BGR Read Selected Text	Starts Background Reader to read text selected in the active application.
BGR Read Clipboard Text	Starts Background Reader to read text from the Windows Clipboard.
BGR Play/Pause	Starts and Stops Background Reader.
BGR Restart	Restarts Background Reader at the beginning of the captured text.
Camera On/Off	Launches the ZoomText Camera.
Camera Toolbar	Brings the camera toolbar into view.
Camera Zoom In	Increases the camera magnification level (one level at a time).
Camera Zoom Out	Decreases the camera magnification level (one level at a time).

(Continued)

Camera View: Full/Docked	Toggles the camera's view between full screen and docked view modes.
Camera View: Cycle Docked	Cycles through the camera docked view types in order.
Camera View: Rotate Image	Rotates the camera image 90 degrees at a time (clockwise).
Camera Manual Focus On/Off	Enables and Disabled camera manual focus.
Camera Manual Focus In	Adjust the camera focus in.
Camera Manual Focus Out	Adjust the camera focus out.
Camera Clarity On/Off	Enables and disabled the camera clarity settings.
Camera Clarity Reset	Resets the camera clarity settings to their default values.
Camera Brightness Increase	Increases the camera brightness.
Camera Brightness Decrease	Decreases the camera brightness.

(Continued)

Camera Contrast Increase	Increases the camera contrast.
Camera Contrast Decrease	Decreases the camera contrast.
Camera Two-Colour On/Off	Enables and disables the selected camera two-colour mode.
Camera Two-Colour Scheme	Cycles through the camera two-colour schemes.
Record Clipboard Text	Starts Recorder to record text selected in the active application.
Record Selected Text	Starts Recorder to record text from the Windows Clipboard.
User Interface Commands	
Start ZoomText	Launches the ZoomText program.
Enable/Disable ZoomText	Enables and disables ZoomText.
ZoomText Toolbar	Restores and minimizes the ZoomText user interface.

Assigning Windows Commands

When selecting the **Choose from a list of Windows commands** option in the Assign Key wizard, the dialog shown below will appear. This dialog allows you to choose a Windows Internet or multimedia command to assign to the feature key that you've chosen in the ZoomText Keyboard Settings dialog.

- ▶ To assign a Windows command to a ZoomText feature key
 - Choose the desired Windows command and then click the **Finish** button.

Assign Key wizard – Windows command options

The following table describes the Windows commands that can be assigned to ZoomText feature keys.

Internet and Multimedia commands	
Browser Home	Opens the default browser to the assigned home page.
Browser Back	Opens the previous web page.
Browser Forward	Opens the next web page.
Browser Favourites	Opens the default web browser's list of favourites.
Browser Refresh	Refreshes the current web page in the default browser.
Browser Search	Activates the default web browser's search tool.
Browser Stop	Aborts downloading of a web page or file in the default web browser.
Launch Mail	Launches the default email program.
Launch Media Select	Launches the default media player.
Media Play/Pause	Toggles play and pause in the default media player.

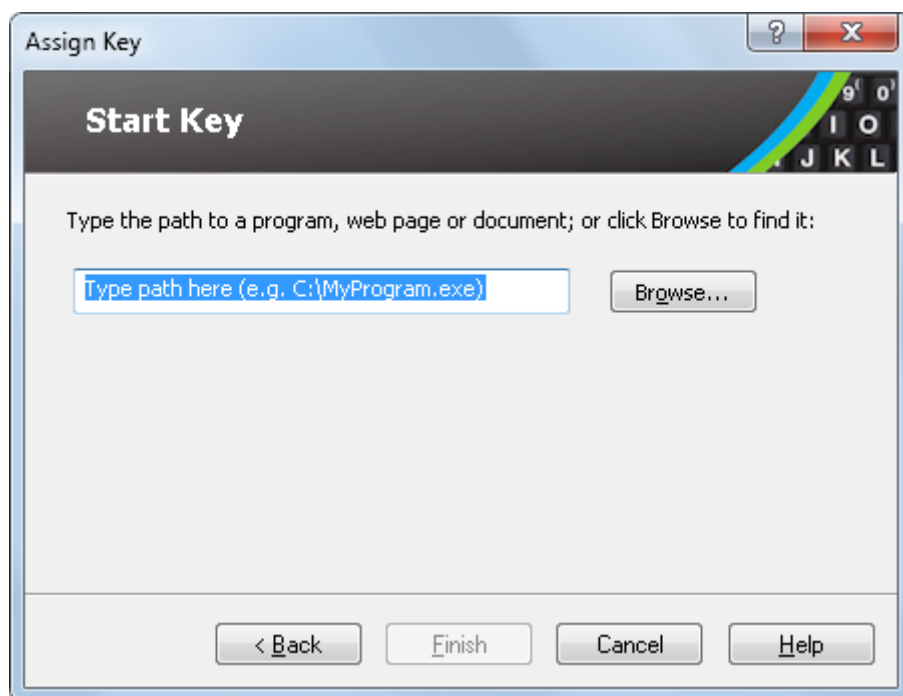

(Continued)

Media Next Track	Moves to the next track in the default media player.
Media Previous Track	Moves to the previous track in the default media player.
Media Stop	Stops the media player.
Volume Down	Decreases the volume.
Volume Mute	Mutes the volume.
Volume Up	Increases the volume.
My Computer	Opens the My Computer applet.
Launch Calculator	Opens the Windows Calculator applet.
Hibernate	Puts your computer in the hibernate state.
Sleep	Puts your computer in the sleep state.
Power	Powers down your computer.

Assigning Program Commands

When selecting the **Start a program, web page, or document** option in the Assign Key wizard, the dialog shown below will appear. This dialog allows you to specify a program, web page or document to open when pressing the feature key that you've chosen in the ZoomText Keyboard Settings dialog.

- ▶ To assign a program command to a ZoomText feature key
 - Enter the path or URL for the program, web page or document that you want to open and then click the **Finish** button.

Assign Key wizard – program command options

Disabling the ZoomText Feature Keys

There may be occasions when you want to disable the ZoomText feature keys. For example, when the ZoomText keyboard software has been installed on a laptop computer; multimedia and Internet keys that are built into the laptop will generate ZoomText feature key commands. This occurs because the built-in keys use the same key codes as the ZoomText feature keys. If you want the built-in multimedia and Internet keys to operate normally, you can temporarily disable the ZoomText feature keys.

- ▶ To disable the ZoomText feature keys
 - In the system tray, click on the ZoomText Keyboard icon and select **Disable All Feature Keys**.

A checkmark appears next to the menu item.

- ▶ To re-enable the ZoomText feature keys
 - In the system tray, click on the ZoomText Keyboard icon and select **Disable All Feature Keys**.

The checkmark is removed from the menu item.

Abbreviated Key Labels

To accommodate the large-print labelling format on the ZoomText keyboard, some of the conventional key names are abbreviated to fit the keycap. These keys are listed below.

Print Screen

Scroll Lock

Pause/Break

Home

End

Insert

Delete

Page Up

Page Down

Num Lock

What the Keyboard Lights Mean

The keyboard lights, located above the numeric keypad, indicate the status of the Num Lock, Caps Lock, and Scroll Lock toggle keys. For example, if Num Lock is on, the Num Lock light is on; if Caps Lock is off, the Caps Lock light is off.

ZoomText Keyboard lights

Maintenance

- **Liquid is spilled on the keyboard.**

If any liquid is spilled on the keyboard, switch off your computer immediately and unplug the keyboard. Turn the keyboard upside down to drain the liquid.

- If the liquid is water, simply let the keyboard dry before using it again.
- If the liquid is a sticky substance, drain the liquid and then completely wipe the keyboard with a damp cloth. Allow the keyboard to dry before reconnecting it to the computer.

- **Keeping your keyboard clean.**

For optimum performance, keep your keyboard clean and free of debris, such as food crumbs or dust. Keyboards should be cleaned on a monthly basis, with a “spray and wipe” cleaner applied to a cloth. Be sure the computer is turned off before cleaning.

Troubleshooting

If you encounter problems with your ZoomText keyboard, you can find troubleshooting information in the ZoomText Keyboard Help system.

► To access troubleshooting information

1. In the system tray, click on the ZoomText Keyboard icon and select **Help**.

The ZoomText Keyboard Help system opens.

2. In the **Contents** tab, select the **Maintenance and Troubleshooting** book.
3. Select the **Troubleshooting** topic.

Troubleshooting information will appear in the right window pane.

Note: Troubleshooting information may also be found in the knowledge base library on Ai Squared's website, located at <http://www.aisquared.com/Support>.

Health Warning

Use of a keyboard may be linked to serious injuries or disorders.

When using a computer, as with many activities, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. However, if you experience symptoms such as persistent or recurring discomfort, pain, throbbing, aching, tingling, numbness, burning sensation, or stiffness, **DO NOT IGNORE THESE WARNING SIGNS. PROMPTLY SEE A QUALIFIED HEALTH PROFESSIONAL**, even if the symptoms occur when you are not working at your computer. Symptoms such as these can be associated with painful and sometimes permanently disabling injuries or disorders of the nerves, muscles, tendons, or other parts of the body. These musculoskeletal disorders (MSDs) include carpal tunnel syndrome, tendonitis, tenosynovitis, and other conditions.

While researchers are not yet able to answer many questions about MSDs, there is a general agreement that many factors may be linked to their occurrence, including: medical and physical conditions, stress and how one copes with it, overall health, and how a person positions and uses his or her body during work and other activities (including use of a keyboard or pointing device). Some studies suggest that the amount of time a person uses a keyboard may also be a factor. For guidelines that may help you work more comfortably with your computer and possibly reduce your risk of experiencing an MSD, consult your local physician.

If you have any questions about how your own lifestyle, activities, or medical or physical condition may be related to MSDs, see a qualified health professional.

Limited Warranty

The ZoomText Large-Print Keyboard is warranted against both manufacturing defects and damage sustained via shipping. The details of each type of warranty are covered below.

Shipping Damage

Packages are sometimes damaged in transit by the package carrier. If you need to return a keyboard due to package damage Ai Squared must be notified within seven (7) days of receipt of keyboard. Failure to notify Ai Squared within the above timeframe means that Ai Squared will consider replacement of the keyboard at its sole discretion.

Manufacturing Defects

Keyboards are covered by warranty for manufacturer's defects for six (6) months after the original shipping date.

Manufacturing defects include but are not limited to items such as sticky or broken keys and broken or inoperable cabling. Damages due to normal use or keyboard wear and tear are not covered. If you have any question as to whether or not a problem you are experiencing is covered under our manufacturer's warranty please call us at (802) 362-3612.

Your warranty covers your purchase, not the exact keyboard you are using. If your keyboard is submitted for repair or replacement your warranty continues from the original purchase date - it does not restart with arrival of your new or repaired keyboard.

Return Policy for All Keyboard Purchases

In order to return a keyboard to Ai Squared for repair or replacement you must first obtain an RMA (Return Merchandise Authorization) number from Ai Squared. No returns will be processed without a valid RMA Number. To obtain your RMA please contact the Ai Squared sales department at (802) 362-3612.

Ai Squared will pay shipping charges for the return of a defective product for the first 30 days after your original purchase date. Once you have spoken to us we will arrange for our shipper to pick your package up and apply an appropriate shipping label. At our discretion we will repair or replace the keyboard.

If your keyboard fails after the first 30 days of usage you must still obtain an RMA from us and then ship the item to Ai Squared at your own expense. We will repair or replace your keyboard and ship it back to you at no cost to you.
